

NRO to host Federal Reconnaissance Users Conference

4 December 2001

The National Reconnaissance Office will host the Federal Reconnaissance Users Conference Feb. 4-7 at its headquarters in Chantilly, Va.

This classified conference is a forum to examine current and future reconnaissance capabilities to respond to threats and explore applications of remote sensing data across an expanding user base. Key objectives of the conference are to identify data needs of federal users, to explore areas of common interest and concern, and to demonstrate those successful data applications.

Appropriately cleared policy makers, planners, project managers and operators and representatives from the remote sensing, geospatial, and information technology community are invited to attend. For more information on the conference and registration procedures call (703) 808-3371.
