TOP SECRET

12 February 1965

MEMORANDUM FOR RECORD

SUBJECT: Satellite Reconnaissance of Cuba

The attached memorandum was written at the insistence of Mr. Friedman, ISA, who felt that he urgently needed a statement of the capabilities of satellites for Cuban reconnaissance. He is convinced that the Secretary of Defense wishes to fly a satellite (optimized for this target) against Cuba and will require these data to substantiate such a proposal.

The memo was dispatched from Dr. McMillan's office on 5 February. Surprisingly, a week later, we still had not received a response from Mr. Friedman.
