NOTE FOR MR. [REDACTED] CIA-OSP

[REDACTED]

Following is the list of so-called Military Space Program Designators which we discussed.

<u>Program Number</u>	<u>Title</u>
[REDACTED]	Tactical Communications Satellite
[REDACTED]	Meteorological Satellite
[REDACTED]	Non Orbital Satellite Interceptor (Alternate Payload) (USAF)
[REDACTED]	Launch Detection Satellite
[REDACTED]	Initial Defense Communications Satellite Program
[REDACTED]	[REDACTED] Program
[REDACTED]	Follow On IDCSP
[REDACTED]	US Navy Navigation Satellite Program
[REDACTED]	Follow On Satellite Interceptor (USAF)
[REDACTED]	Detection Satellite

A brief explanation of necessary restrictions. The number used in conjunction with the title carries a military SECRET classification. The numbers used alone -- UNCLASSIFIED. The titles standing alone are UNCLASSIFIED. One exception: on Program [REDACTED] Meteorological Satellite, we do not associate title with number in any document with a lesser classification than SECRET SPECIAL ACCESS (for obvious reasons).

This is certainly not [REDACTED] information; however, I have classified this paper SECRET [REDACTED] to protect the total listing since 1) you are not rigged for the Air Force Regulation 205-23 type SPECIAL ACCESS and 2) it can be transmitted to you so easily.

CONTROL SYSTEM [REDACTED]

You may use the listing under the normal restrictions I have described.

Trust this will help.

Sincerely,

**WILLIAM R. YOST
Lt Colonel, USAF**

Lt Col Yost/mjn
