TOP SECRET/CODEWORD

July 15, 1975

MEMORANDUM FOR

CHAIRMAN, NSC UNDER SECRETARIES COMMITTEE

SUBJECT: Establishment of a Standing Committee on Space Policy

The President has directed that a standing committee of the Under Secretaries Committee be established to address issues connected with our national space policy as it relates to the civil/military interface.

The committee should review the relationship between civil and intelligence space programs, the military significance of certain civil space programs, and any relevant international considerations. The committee should propose for the President's consideration appropriate new policies or changes to existing policies, and be a forum for the interpretation and implementation of such policies.

- The membership of the committee should include the members of the Under Secretaries Committee augmented by representatives of NASA, NRO, OMB, the President's Science Adviser, and other agencies as appropriate to the particular issue under consideration. The committee should be chaired by the Under Secretary of State for Political Affairs.

DOD and NASA have requested that at an early opportunity the committee examine the international political considerations of remote earth sensing, the protection of sensitive space technology, and the public release of space data and information.

Henry A. Kissinger
