TO P S E C R E T 872295Z MAR 69 CITE

PRIORITY

CORONA

FOR

THE EXAMINATION OF THE COVERAGE OBTAINED ON MISSION 1106 BY THE DISIC INDEPENDENT OPERATIONS, REVEALED THAT 12 PERCENT OF THE TOTAL FILM LOAD WAS WASTED BY OCEAN COVERAGE. THE MAJORITY OF THIS WASTED FILM OCCURED ON REVS 7, 18, 34, AND 115. THE MOST SERIOUS OFFENDERS ARE 7, 18, AND 115. ON THESE PARTICULAR REVS A TOTAL OF 128 CAMERA CYCLES WERE REQUESTED BUT 671 CAMERA CYCLES WERE ACTUALLY EXPENDED. I'M SURE YOU WILL AGREE WITH ME THAT THIS IS AN EXTREMELY POOR UTILIZATION OF DISIC FILM AND CAN BE SORTED OUT BY THE USE OF THE CALICO PROGRAMMING TECHNIQUES. IN THIS CONNECTION, WOULD YOU HAVE YOUR PEOPLE SUBMIT A PLAN TO THE DABO BY 1 APRIL 1969 FOR IMPLEMENTATION OF PROCEDURES TO PROGRAM ALL FUTURE DISIC MISSION USING CALICO TECHNIQUES. THIS PLAN IS TO COVER BOTH SCHEDULES AND COSTS AND SHOULD BE STRUCTURED TO INSURE THAT PROCEDURES ARE FULLY IMPLEMENTED PRIOR TO MISSION 1127.
