[REDACTED]

AFTER WEIGHING THE PROS AND CONS [REDACTED] HAS DECIDED TO CONTINUE USING FLIGHT
SLIT WHICH REPRESENTS BEST COMPROMISE FOR INTERMEDIATE PROCESSING CURVE. IF
0.15 INCH SLIT USED, FULL PROCESSING WOULD BE REQUIRED FOR SUNLIT SCENES AND
THE LATITUDE FOR PROCESSING FOR SHADOW DETAIL WOULD BE GREATLY DIMINISHED.
BASED ON QUALITATIVE EVALUATION ON MENS 1006, 1007, AND 1008, [REDACTED] CONVINCED
THAT PROCESSING IS SOMETIMES EXTENDED BEYOND THE OPTIMUM REQUIREMENTS FOR
EXPOSURE GIVEN. RECOMMEND THAT [REDACTED] TEAM INSTRUCT [REDACTED] TO ADHERE TO
INTERMEDIATE PROCESSING - OR LESS IF CONDITIONS DICTATE - UNLESS FULL PROCESSING
IS NECESSARY TO OPTIMIZE RESULTS WHEN SHADOW RATHER THAN SUNLIGHT DOMINATES
THE SCENE.
