8. REQUESTED CHANGE: Continuation on Page 2. (Be specific, cite RRG sections, page number)

Old: 1.4.2 (U) Non-Operational SIGINT Systems

Redact: ~~(S//TK//REL TO USA, FVEY)~~ Redact all information, including the words themselves, concerning non-operational SIGINT programs and missions that remain classified.

[redacted]

EARDROP [redacted]

EARPOP [redacted]

[redacted]

(b)(1)

(b)(3)

New: 1.4.2 (U) Non-Operational SIGINT Systems

"Remove both of these identifiers from the redact list" and add;

Release: d. "remove after declassification (S//TK//REL)" (U) The program Identifiers EARDROP and EARPOP. Also release "E", which was used to indicate either of these Program Identifiers.

9. JUSTIFICATION: (Cite authority for change request)

~~(S//TK//REL)~~ IRRG believes that the ELINT program identifiers EARDROP and EARPOP are no longer sensitive given the release of the following ELINT programs; GREB/GRAB, POPPY, and the SIGINT I, and upcoming SIGINT II and III program releases. These program identifiers were stamped on the top and bottom of records that contained ELINT satellite information and were used like the BYEMAN stamp. This RRG change is just for the program identifiers, and not necessarily for any/all content of the documents on which these identifiers are found. All the EARDROP programs have been declassified. The Review and Redaction Guide (RRG) will continue to protect [redacted] the only remaining still-classified program under the EARPOP identifier. No [redacted] information is/will be included in the releases of SIGINT I, II, and III Systematic Declassification Reviews (SDRs). These ELINT program identifiers (EARDROP and EARPOP) do not meet the standard for continued protection under Executive Order 13526, and is contrary to the "harm-in-release" principle of the FOIA Improvement Act of 2016 and the spirit of memoranda and other guidance issued by the President, the Attorney General, the DNI and DoD on transparency and openness in Government.
