=====

(U) I've gone over the hit list, and it appears that most of the content of [Redacted] is responsive. Specifically, looks like folders [Redacted]

(b)(3)

(U) Whatever is the simplest way to do this will work.... and I certainly don't need the entire mess immediately. Would it be simpler for me to get the entire box and copy the content of each of the folders? I'd like to make this as easy as possible.
