Coin Front

The Mission Integration Directorate (MID) logo is laid on a background of stars to depict its alliance to the NRO vision of above and beyond. MID is set over the Earth to portray its support to the NRO's global impact. Finally, the integral symbol illustrates MID's efforts to gather and create a collection of technologies and services that enable the integration of systems and applications across the NRO enterprise in support of the IC and DoD.

Coin Back

The military and civilian members in silhouette, represent world-wide coverage and support to NRO IC and DoD users and customers. The generic spacecraft, aircraft, and ship represents MID's medium for collecting and providing NRO's end products. "Overhead to the Edge" speaks to MID's commitment and support facilitating movement of data to or from tactical end users, when an NRO system either generates or disseminates data; reaching out to the disadvantaged user, going the last mile.
