Summer 1967

THE NRO/DIA/NPIC INTERFACE

I. GENERAL

A. How well/badly is the present interface working?

1. Specific customer problems
2. Customer suggested solutions to problems

II. SPECIFIC

1. Camera Manuals

   (a) How useful, as written?

   (b) How widely used? How many people have signed the access sheet? How are the dates of those signatures distributed? Biased back toward publication date? Or are many fairly recent?

   (c) Do the manuals contain enough/too much/too little information?

   (d) What would be different for the customer ██████ were TKH with ███████████? How may people would need access to the ████████ annex? How many new ███████ clearances would be required?

2. Operational Messages

   (a) How does the customer handle ████████████ essages?

   (b) Do the people who handle these messages have clearances just to do this job or would they have clearances anyway?

   (c) How many people are involved?

   (d) Are the present arrangements re these messages satisfactory? If not, what change is suggested?

3. Planning

   (a) How does the customer do his resources planning for the

future (personnel, facilities, equipment)?

(b) How many people are involved directly in this planning?
How many need ███████ clearances? How many of these
would have ███████ clearances anyway?

(c) Does the customer believe he is getting enough, or the
-correct, information to do future resources planning?
What changes are suggested?
