General Statement of Indroduction:

Poppy with its six years of evolution has only recently been engaged in the contribution to the EOB Charter as defined in this paper, but the requirements for EOB do not place "LOCATION OF EMITTER" as the sole criteria for excellence. The ability of POPPY to 

 is significantly important in the EOB Charter, when such ability is evidently, ~~and fix with the~~ lacking in the other Programs.

In Table #1 the Looks/Day (Vehicle) for Setter and Fanion appear to have been reduced by hand notation due to reduced swath width...by the same token POPPY should be increased by increased swath width. This discrepancy is reflected throughout this paper with very severe implications as to the overall validity....
