Subj: Data Link Transmitter considerations or 7105.

Now after almost nine months experience of operational usage of the Data Link Systems of 7104 there are several areas of Data Link design and capability which are now possible to define with greater clarity than befor.

1. Radiated Power Level;

Payload # 141 with 774 and 850 mw respectively from the data-link transmitters have been found to be the most satisfactory of all the payloads with regard to signal level.
