DRAFT pw  
13 Aug 65

**The Task Force**

1. Approves of the approach shown in the paper submitted by the SWG subject to the addition of the column of "intent of the users" after "monitoring."
2. Fully understands that the SWG has not yet completed this step in terms of all emitters. This must be done.
3. Expects the SWG to define the precision measurements required by emitters employing critical criteria against "intent of user."
4. Insists that the list be eventually be            by:
  - a. Designating those items most amenable to other collection means.
  - b. Listing items in priority.
5. Develop a comparable paper and COMINT.
6. Identify the areas where the state-of-the-art permits collection.
7. Cost estimates of the equipments and processing.
