at least 40 experimental Flight systems

Critical areas of Coordination with Requirements and Analysis groups are forthcoming.

Success in the operational effort in 1963 and 1964 does not necessarily indicate that the same people will succeed in doing the impossible in the year ahead, ~~only~~ A few good people can ~~be~~ be expected to do two years work in a two year period and not in 18 months . Loss of the services either permanently or temporarily of key personnel in this NRL program would be a major disaster; of the type that in some cases not even time could recoup. One of the Very Critical Areas in meeting operational schedules in the past has been the lack of complete liason with the Supply Division. The slow start in procurements ~~view~~ of

(at the beginning of a "New Effort") the critical experimental hardware from ITT (Kellogg Div of) Fort Wayne in the past ~~xxx~~ years has been reflected in a period of ~~xxx~~ months from the first contact with Supply Division to award of Contract, 20 Feb until first week in July 1965. The results will be that the contractor's accomplishments after

Program must settle for the ~~xxx~~ head of after 15 months, and in Diode-filters etc in Band this is ~~xxx~~ extending to the art and time is crucial.
