R6/302-66

Siting of Special Projects Antennas at [redacted]

1. Reference is made to drawing EML 5430-130/66, dated 26 April 1966.
2. The contractor for [redacted] has been consulted to determine if the siting of the proposed special projects antennas in the southeast corner of the site was acceptable. He has advised that the siting as shown on the above referenced drawing will not affect the operation of the [redacted] antennas. Per conversation with Mr. [redacted] on 22 September 1966, the antennas on the roof of the building will not be installed. Plans for any future antennas must be coordinated with R6 prior to final siting and installation.
3. Request you take appropriate action using SEACOL construction funds not exceeding \$10,000 for site and building modifications, as discussed.
