

MEMORANDUM

To: All members of the
Satellite Techniques Branch

10 March 1964

From: Edgar L. Dix

Subj: Satellite Technical Management Assignments for 1964

1. The concept of project-type management of satellite design, construction, and testing has proven to be effective in producing reliable hardware. It also provides an opportunity for more individuals to become familiar with the overall design of a complete satellite system.
2. The following assignments are effective immediately for the satellites indicated:

<u>Payload Number</u>	<u>Responsibility</u>
140	[Redacted]
137	[Redacted]
141	Cudmore, Shoyer
142	Poole, [Redacted]
145	[Redacted] Winkler, Gorday, [Redacted] LESTER
139	Winkler, [Redacted]
143	Eisenhauer, [Redacted]
144	Poole, Huntley, Roszak

Quality control procedures, drawings and document control, and system design compatability will be the responsibility of [Redacted]

Quality assurance and failure analysis will be the responsibility of [Redacted]

3. A complete definition of the duties and responsibilities involved in the above assignments is being prepared for later distribution.
