BRIEF OF RESULTS

The mission of the Ad Hoc committee is to prepare a staff study for Op-92.

Trexler, [redacted] gave background discussion on the proposed reconnaissance satellite. Stress on security and comparison with other projects were the primary topics of the first meeting. The big competitor, the Air Force 117L, was reviewed in detail. The funding on the Air Force project through FY 59 is \$233.7 million. ONR has \$100 thousand possibly available for electronic reconnaissance.

The unclassified title of the NRL proposed project was instigated by CNO, Op-30G on 14 July as "Tattletale". The committee accepted the title with the NRL proposed "EROS" (for Electronic Reconnaissance Satellite) being rejected.

A reading room for material on the subject was set up in the Pentagon. Special clearance is required for access.

ONR will supply contact with prime and sub contractors on the Air Force and Army projects. NRL will provide answers to questions of support requirements and system engineering.
