

OPTIONAL FORM NO. 10
MAY 1962 EDITION
GSA FPMR (41 CFR) 101-11.6

UNITED STATES GOVERNMENT

Memorandum

TO : 5600

DATE: 10 Dec 1968

FROM : 5650

SUBJECT: call

1. called on Tuesday, 10 Dec., A.M.. He had talked to Dr. Frosch about the NRL capability of and tracking of ships at sea, and that this was being done illegally or semi-legally without Navy mission or charter, and that action should be taken to get Navy this Mission. Dr. Frosch responded that he was aware that NRL was looking into this but was not aware that the technique had been proven or advanced beyond the proposal stages. Frosch had already talked to Dr. Foster about the same subject based on preliminary NRL ideas, and Dr. Foster had indicated that Navy should be doing this and should have the mission.
2. To help get the mission assigned, wants a point paper describing the capability as it exists and what it could be if pursued. The dollars should be indicated for what capability level. When he gets this he will take necessary steps to circumvent AF or other interferences. In other words he is prepared to take and run around the system, but needs our help. He would not implicate NRL in the action in the form of revealing the source of the point paper. He would like some suggestions as to what would be sensible approach/es.
3. Also he wants a statement of what the could furnish. He has investigated through the system and was told that "we have all that they can provide". I stated that this is correct, but out of context. (They have expressed willingness to get what we want - such as any or all of system or components.

[Redacted] O.L.

DATE: 12/12/68

FROM : [Redacted]

SUBJECT: [Redacted] phone call of 12/10.

1. Am shocked at poor observation, security risk.
2. As regards 9's 1, 2 strongly recommend DNL do nothing until he gets briefed by Deoyu or Hurl. Jungs on the related efforts now under way in OPNAV.
3. The point paper he requests would be useful later.
4. On last 9, concave you should check with [Redacted]
