

PROGRAM "C" PLANNING [redacted] meeting @ NRL 25 February 1970.

~~TOP SECRET~~
MISSION 7107 DESIGN CONCEPT EVOLUTION:

1. [redacted] Lee HAMMARSTROM
2. changes in the Frequency of Collection Systems. Vince ROSE
3. Command Systems (Improvements in) Lee HAMMARSTROM
4. Target Of Opportunity Tasking (TOOT) R.D. Mayo
CDR OLSON
5. Continuation of Analog Recordings .. Lee Hammarstrom
6. Digitizing all sites. R.D. MAYO.

General Climate within the community within which this concept evolution is taking place has improved remarkably to the point now where there is only constructive criticism. This seems to be brought about by the influence of [redacted] of the N-1 Group at NSA who only recently was made the NSA Program Manager for [redacted] I am concerned now that his duties have been changed we will not have his guidance and significant council. He has taken all the debate out of so many things and weighed the facts and dropped out all the party politics, and his guidance seems to be taken without question by [redacted]
