22 JUL 1974

INTELLIGENCE

MEMORANDUM FOR DIRECTOR, NATIONAL SECURITY AGENCY/
CHIEF, CENTRAL SECURITY SERVICE

SUBJECT: [redacted]/P-11 Processing Review

25X1

Your Advanced Program Support proposals for the coming year are largely responsive to what I believe to be the most important needs, and reflect an appropriate level of effort toward that end. The review also identified one area which I believe requires further consideration prior to final decision.

I would like to obtain a more detailed assessment of the processing activities a [redacted] and P-11 activities. In particular, I believe that current interactions and proposals for functional or equipment transfers or consolidations require further examination.

25X1

Accordingly, I have asked Mr. John Slack of my staff to review these matters, and have also asked Mr. Colby to provide a representative of the Intelligence Community Staff.

Mr. Slack will work closely with program management representatives in organizing and conducting this effort.
