10. Mr. Clyde W. Elliott
11. Mr. John J. Monroe

I feel it very important, therefore, that we should endeavor to achieve the earliest flight dates for the photographic recovery and photographic readout payloads/ ^{in that priority.} I further feel that the ferret payload should be reduced to an engineering effort program with flight testing being excluded from the program at this time. . Consideration should be given to possible delaying elements, added insurance against such delays and specifically to the desirability of introducing into the ^{ENGINEERING EFFORT FOR} program, an additional payload type such as an advanced panoramic camera which with recovery could provide broad coverage with comparatively high resolution.

Noted by the
Under Secretary
of the Air Force

MEMORANDUM
