WS 117L DISCOVERER, SENTET AND MIDAS PROGRAM AND FUNDING CHRONOLOGY 1946-1959*

1946-47	RAND Corporation investigated the feasibility of a satellite as a reconnaissance vehicle. These studies continued through 1953.
12 Jan 48	General Hoyt S. Vandenberg, in a policy statement on a satellite vehicle, noted that R and D on a satellite vehicle should be pursued as rapidly as state of the art permitted.
1951	Air Force let feasibility studies for critical satellite subsystems to RCA, EAA, Bendix, Flader, Chalmers and Vitro Companies.
Feb 54	Final RAND report on Advanced Recommaissance System. System feasibility was established. Development was recommended.
27 Nov 54	ARDC published System Requirement No. 5 on Advanced Recon- naissance System.
16 Mar 55	Air Force issued GOR 80(8A-2c) for a strategic recommaissance satellite weapon system.
Mar 55	Design study proposals solicited from IAC, RCA, Martin, Bell Telsphone. Bell Telsphone declined to propose.
May 55	MSC action 5520 directed the Department of Defense to develop capability of launching small scientific satellite by 1958. Effort not to prejudice or interfere with other satellites for research or intelligence. Emphasized peaceful purposes. Would be a technical step to demonstrated satellite achievement with prestige and psychological benefits. Cost estimated as \$15-20M. (Vanguard the result).
0et 55	General Power directed that Advanced Reconnaissance System development program be transferred to WDD.
13 Jan 56	Memorandum of Understanding on transfer of Advanced Recon- naissance System from ARDC Detachment No. 1 to WDD. Generals Schriever and Estes agreed WDD office would be established about 15 February 1956, take over Advanced Reconnaissance System program.

^{*} Prepared by the Air Force Ballistic Missile Division Historian.

COWNGRADED AT 12 YEAR
US ALS: NOT AUTOMATICALLY
DEULASHIED. DOD DIR 5200.10

WDGEH-2

- 14 Jan 56 WDD published a <u>WS 117L Preliminary Development Plan</u> in response to a request from Eq ARDC. Based on a possible need to demonstrate an orbital capability within the ICE, total cost was estimated at \$95.5%
- 12-20
 Mar 56
 A joint ARDC-WDD-WADC-AMC contractor evaluation board met at Wright-Ratterson AFB to evaluate the 117L design studies prepared by RCA, Glenn L. Martin, and Lockheed Aircraft. Board found Lockheed as best qualified and recommended award of contract to Lockheed for development of WS 117L.
- 2 Apr 56 WDD published W8 117L Advanced Reconnaissance System

 Development Plan. R and D contract funds for system estimated at: FY 1956, \$7.0M; FY 1957, \$32.1M; FY 1958, \$75.6M.
- 22 May 56 WDD authorized to announce Lockheed selection, expend remaining Project 1115 funds on 117L. No other funds available at moment.
- 24 Jul 56 WDD Development Plan for WS 117L approved by Hq UBAF.
- 3 Aug 56
 USAF (DCS/D) issued Development Directive No. 85 on WS 117L,
 Advanced Recommaissance System. WS 117L given 1A priority,
 1-6 precedence rating. But "because of fund limitations,
 only \$3M of FY 1957 P-600 series funds are available to your
 Command to initiate this development."
- 28 Aug 56 WDD pointed out the effect of FY 1957 WS 117L fund limitations on WS 117L development, and requested \$21.9M additional FY 1957 funds for the program.
- 23 Oct 56

 UEAF again cited limitations on WS 117L P-600 funds. Guidance given WDD included: 1) prolong development, 2) maintain minimum belanced rate of development progress on vehicle and components instead of on Development Plan target completion dates. TWX stated that Headquarters attempting to reprogram \$7.M more P-600 FY 1957 funds.
- 29 Oct 56
 USAF source selection board swarded prime contract on WS 117L to Missile Systems Division, Lockheed Aircraft (Contract AF 04(647)-97).
- 21 Nov 56 WDD submitted FY 1957 WB 117L fund requirements totalling \$17.8M in P-100 and 200 to DCS/D.
- 29 Nov 56 Secretary of the Air Force Donald Quarles was briefed on WS 117L status and program.

- Lt General D. L. Putt, DCS/D, informed ARDC that FY 1957
 P-600 funds for WS 117L had been increased from \$3M to \$5M, and efforts were under way to reprogram \$5M more. For management planning, WSS should count on \$10M total P-600 for FY 1958 also. Other efforts would be made to get P-100 and 200 funds. Other guidance: 1) develop and test components, 2) do not make mockup until advised, 3) do not plan launch before FY 1961.
- Commander, WDD, informed DCS/D that lack of FY 1957 P-100 and 200 funds was preventing procurement of materiel and equipment essential to maintaining a balanced system oriented development program, and that P-600 funds ceilings for FY 1958 were considered inadequate to meet the program minimum component development and test needs.
- Answering a Department of Defense request, WDD furnished DCS/D with material on possible use of WS 117L as RGY satellite. Indicated it could be done at cost of \$66M by late 1958 or early 1959 if ATLAS development was satisfactory. WDD not enthusiastic about approach because of possible interference, short development time, order of confidence.
- 11 Feb 57 WDD warned IMSD that they had \$8.5M on contract through 30 June 1957, and that they should not overcommit.
- ARDC received guidance letter from DCS/D, USAF on planning and funding requirements for WS 117L. Indicated that F-100 and 200 Ff 1957 funds were over-programmed. Mention was made of Secretary Quarles' views regarding a definite slow-down, and emphasis on component development to insure greater success. No orbital testing was to be undertaken in development prior to January 1960. Development of WS 117L should be conducted along conventional lines. Establish a Wespons System Program Office at WDD. \$10M P-600 funds were available. For Ff 1958, estimates were that a total of \$35M would be available for WS 117Le
- WDD published Systems Development Plan, Advanced Reconnaissance System, WS 1171 for various degrees of operational uses, 1960-1965. Funding needs estimated through 1965 totalled \$223.7M.
- 8 Jul 57 IMSD informed AFEMD* they needed \$7.9M to fund the WS 117L program between 15 August and 30 November 1957.

^{*} Name of Western Development Division (WDD) was changed to Air Force Ballistic Missile Division (AFRMD) 1 June 1957.

10 Jul 57	WS 117L assigned unclassified nickname New Horizon.
13 Aug 57	IMSD informed by AFRMD that W8 117L FY 1958 funds total- ling \$3.9M were available to carry the program through 30 October 1957. Adjust program accordingly.
21 Aug 57	AFRED informed LMED that WS 117L FY 1958 P-600 funds could not exceed \$9.6M, with no more than 50% expended in the first six months.
3 Sep 57	AFRED informed by DCS/D that only \$10M P-600 Ff 1957 WS 117L funds were available, and as yet no P-100 or 200 funds, though efforts were being made. Limit activity to \$10M funds. Authority to mockup vehicles granted.
16 Sep 57	Air Council reviewed, approved WS 117L program as presented, approved go-ahead as fast as possible consistent with good management.
19 Sep 57	AFEMD submitted WS 117L FY 1958 and 1959 austere funding requirements to DCS/D. Stated that \$48M in FY 1958 would allow initiation of the flight test program by mid-CY 1958.
9 Oct 57	Following Sputnik, in answer to Hq USAF request as to efforts and resources required to accelerate the ICBM and IRBM, an estimate was made for WS 117L. AFBMD pointed out that a large amount of funds would be needed to regain lost time due to fund strictures and lack of firm program approval.
	With \$99.2M FY 1958 and \$121.7M FY 1959 funds program could be advanced six months to one year if priority were given effort.
10 Oct 57	With \$99.2M FY 1958 and \$121.7M FY 1959 funds program could be advanced six months to one year if priority were given
10 Oct 57	With \$99.2M FY 1958 and \$121.7M FY 1959 funds program could be advanced six months to one year if priority were given effort. AFBMD requested interim FY 1958 procurement authority of at least \$4M P-100 and \$1M P-200 funds by 25 October to
	With \$99.2M FY 1958 and \$121.7M FY 1959 funds program could be advanced six months to one year if priority were given effort. AFEMD requested interim FY 1958 procurement authority of at least \$4M P-100 and \$1M P-200 funds by 25 October to prevent a work stoppage. Secretary of the Air Force James Douglas approved the WS 117L program as presented to the Air Council as a planning objec-

12 Nov 57	RAND Research Memorandum 2012, A Family of Recoverable Recommissance Satellites published. Prepared by M. E. Davies, A. H. Katz and others, it proposed using THOR plus Aerojet (second stage of Vanguard) as boosters.
27 Mov 57	AFRED requested that ICHN/IREM overtime policies be extended to WS 117L, replacing the existing 2% of programmed manhours overtime limitation.
20 Dec 57	Subsystem "G", WS 117L, (ICHM Attack Alarm) preliminary design completed. Fabrication of experimental psyload units begun.
6 Jan 58	IMSD submitted a program acceleration plan for WS 117L (IMSD-2832) as requested by AFHMD in Hovember 1957. Accelerated program was based on Thor-boosted early flight with a recoverable capsule as proposed by RAMD. Flights to begin in late 1958. Increase manufacture of IMSD vehicles. Atlas-boosted flights to begin in early 1959. General Schriever approved plan in principle, subject to reviews of special areas.
21 Jan 58	AFRMD notified that Assistant Secretary of Air Force (Materiel) had approved use of overtime on WS 117L "as may be necessary to meet the approved objective".
22 Jan 58	Program acceleration plan submitted. Plan included a photo- graphic recommaissance configuration of a Thor-boosted recoverable recommaissance package.
23 Jan 58	Chief of Staff USAF approved acceleration of WS 117L progrem. FY 1958 funds would be provided when actually required.
29 Jan 58	Contract AF 04(647)-181 given IMED for Thor-boosted test vehicles. This became the DISCOVERER program.
Feb 58	Hq USAF considered expanding Project Able to include WS 117L test vehicles. AFFMD recommended against this because 1) Able configuration not yet proven; 2) would disrupt Able schedules. After several successful launches, their use as WS 117L test vehicles could be reprogrammed if authority to proceed were given immediately.
3 Feb 58	President Dwight D. Risenhower directed that <u>highest</u> and <u>equal</u> national priority be given to ballistic missiles, satellites and defense programs. (ICEM, IREM, WE 117L, WE 224A)

- 24 Feb 58 Secretary of Defense Neil McElroy approved in principle the proposed acceleration of WS 117L to be conducted under direction of ARPA. AFPAD to submit a development plan.
- 26 Feb 58

 WS 117L Site Selection Board convened at AFRED. Board chaired by Colonel F. C. E. Oder, members from AFRED, SAC, AMC, Hq USAF. Board to select tracking and data acquisition sites for the system.
- 28 Feb 58
 Mr. Roy Johnson, ARPA, in a memorandum to the Secretary of the Air Force concluded that:
 - a. ATTAS/WS 117L Project should be accelerated and given highest national priority in order to attain IOC at earliest date.
 - b. Thor-boosted interim reconnaissance system with light-weight recoverable capsule was a duplication of "a," Do not pursue this program.
 - c. To attain early flights of Lockheed second stage, Air Force may find it desirable to use Thor-boosted test firings. Thor boosters cheaper and available sconer than ATIAS, also could be used with second-stage Lockheed vehicle for experimental recovery flights with animals.
- Mar 58

 AFMD activity in interim visual recommaissance program

 (II A) terminated in accordance with Mr. Johnson's message of 28 February.
- Chief of Staff, USAF, directed that WS 117L and other space projects which depend on the use of IC/IREM's be administered in same manner and with same procedures as IC/IREM programs. ("Gillette procedures"). AFCCM to be central point of contact, coordination. Approved development plans would constitute action documents.
- 4 Mar 58 OSD approved acceleration of WS 117L to include launching satellite test vehicles based on THOR booster.
- Ickheed notified that Hq USAF had disapproved the WS 117L recoverable recommissance payload program. (WS 117L Program IIA). IMED notified to recrient THOR-booster WS 117L program for acceleration using THOR-boosted flights for early WS 117L tests--orbital flights for exercise of ground-space communication network, concept for recoverable capsule, for aero-medical research flights.

14 Mar 58	AFRMC reviewed accelerated WS 117L program, agreed on use of THOR booster for system test in orbital satellites.
19 Mar 58	AFRMD informed that all statements on the nature and timing of ARPA missile and satellite projects will come from OSD.
Appr 58	AFEMD requested by USAF to revise 15 March WS 117L Development Plan financial annex to downward from \$214M to \$152M. Keep program flexible.
Apr 58	Biosatellite programs added to Advanced Reconnaissance Systemrecoverable capsule.
Apr 58	UMOH engine development initiated.
28 Apr 58	DOD directed interchange of technical information and visits on satellites and space programs between US Army and Air Force up to SECRET. Refer other cases to head-quarters.
30 Apr 58	NORAD expressed interest in infrared capability of WS 117L as an air defense attack alarm against ICEM launches.
May-Jun 58	Ft Stevens, Oregon, selected as location of WS 117L NW tracking and data acquisition station.
May 58	Advanced Reconnaissance System renamed SERTRY.
9 May 58	Lt General Francis H. Griswold, V/CinC/SAC, in a letter to Commander ARDC, pointed out that SAC enthusiastically supported WS 117L. Recommaissance features a tremendous potential, especially infrared, photographic, electronic. Also a requirement for a communications satellite, high altitude (22,000 miles) advanced surveillance systems.
19 May 58	Cognizance over WS 117L assigned to ARPA. (DOD Directive 3200.5)
19 May 58	Subsystem "G" (ICEM Attack Alarm) Engineering Analysis completed.
23,-22 May 58	First meeting, ARS Weepon System Phasing Group.
20 Jun 58	USAF informed major commands that WS ll7L carried highest national priority, DX rating of .Oll Brickbat, precedence rating of 1-1. Informed commands that field activities would begin in early 1959.

- ARPA Order No. 9-58 issued. Announced Sec Defense had approved the assumption of responsibility for the Advanced Recommissance System (WS 117L) by ARPA. AFMED to continue the project: to submit a detailed development and financial plan to ARPA. \$22.7% made available initially.
- AFRICO Advanced Recommissance System (MS 117L) "New Horison" Development Plan published. Funding program.

 FY 58, \$60N; FY 59, \$215N, later revised to FY 58, \$67N; FY 59, \$198N. Plan contained both THOR-boosted version for component test and demonstration of orbital capability, and ATLAS-boosted recommissance program.
- Jul 58
 Initial arrangements made by AFMED to organize a unit capable of aerial recovery of WS 117L capsules. 9/Cl19J aircraft to be used. "Aerial Smatch" called Project Hot Hand. Aircraft to come from TAC, 6593d Test Squadron (Special) activated by ARDC GO 38, effective 1 August 1958. Unit to be based at Hickam AFR.
- Jul 58 WS 117L Site Selection Board selected NE tracking and data acquisition station site at New Boston Gunnery Range, N.H. Only site which met criteria and BOD needs.
- ARPA noted to Secretary of Defense that the question of the operating agency for WS 117L should be reviewed in the light that many agencies have an interest in the information.
- Jul 58
 ARPA expressed interest in features of WS 117L (subsystem "G") as an infrared attack alarm system.
- 15 Jul 58 ARPA directed that monthly and quarterly progress reports on WS 117L be forwarded directly to them. Form prescribed by ARPA.
- 17 Jul 58 ARPA Order No. 9-58 funds increased to \$30.7M to purchase four WS 117L upper stages. (Amendment No. 1)
- 18 Jul 58 Air Force authorized by ARPA to procure long lead time items to support THOR-WS 117L firing schedule which is to begin in Movember 58.
- 20 Jul 58 ARPA requested briefing on WS 117L with special reference to applicability of subsystems and components to other uses such as communications, weather, and scientific measurements, use of ground components for general satellite tracking. Also wanted information on advanced reconnaissance satellite—engines, television, infrared, power supplies.

- Director, ARPA, informed Sec Air Force \$215M was programmed for WS 117L in FY 1959. \$30.7M available to AFBMD. Balance subject to Congressional action, BOB apportionment. Total included bio-medical project. AFBMD informally requested to submit a new development and funding plan within these limitations, and to indicate how they would use more money if additional funds are available.
- 22 Jul 58 ARDC GO No. 38 designated and organized 6593d Test Squadron (Special)—purpose for serial recovery of satellite payloads. (In place of AFFTC for training, Aug-Dec 58, then to Hicken AFB, Hawaii.) Squadron assigned to Det #2, ARDC, AFEMD, for administrative and operational control.
- 22 Jul 58 Ottumra, Iowa (Maval Air Station) picked for location of W8 117L Central Tracking and Data Acquisition station.
- 28 Jul 58 AFMED held technical review of Attack Alarm System. Probability of success quite high.
- Aug 58 New Boston Bombing Range, Grenier AFB, N.H., approved as site of Northeast tracking and data acquisition station.
- 4 Aug 58 ARPA Order No. 9-58 funds increased to \$50.7% (Amendment No. 2).
- Procurement of long lead time items authorized. THORWS 117L vehicle procurement increased an additional 9 over the 10 authorized to a total of 19. Intent to utilize these for bio-medical and other measurements of space phenomena. Prepare new development plan based on \$215M FY 1959 ARPA program.
- AFEMD established a Management Survey Team to look into all aspects of WS 117L Program Management at IMED, IAC. (ARDC SO N-770)
- 25 Aug 58 ARPA Order No. 9-58 funds increased to \$70.7M. (Amendment No. 3).
- Sep 58 WS 117L interim tracking and telemetry facilities beneficially occupied at Vandenberg AFB, California; Naval Air Station, Pt Mugu, California; Kaena Point, Calm, Hawaii; Annette Island, Alaska; Kodiak Island, Alaska.
- Sep 58 Former Haval Air Station at Ottumma, Iowa, approved as the site of the WS 117L central tracking and data acquisition station.

WDGEH-2

- AFMED published Advanced Recommissance System (WS 117L)

 Development Plan. Contained both THOR-and ATMAS-boosted phases of program. Funding program, FT 59, \$231M; FT 60, \$296M. Plan is profusely illustrated and explanatory in detail.
- AFRED published SENTEN Operational Annex to Advanced Reconnaissance System Development Plan, Contained operational concept, command responsibilities, system characteristics. Operations, personnel and training, logistics, facilities, schedules, funding program.
- 17 Sep 58

 AFBO recommended acceleration of Attack Alarm Development.

 Development Plan prepared which included: August 1959 first test launch and January 1961 first operational launch.
- 17 Sep 58
 ARPA requested that term SEPTET instead of WS 117L be applied to Atlas Operational Capability previously designated as Pioneer visual, Pioneer ferret. Budget these separately, budget rest of program as improved military space systems.
- 22 Sep 58 General Power, CINCSAC, briefed on Attack Alarm Development Flan. General Anderson, AHDC, Air Force Ballistic Missile Committee and Air Force Staff briefed on Attack Alarm Development Flan.
- 23 Sep 58 In a personal TMX, General Power informed General LeMay that he was distressed over the reluctance of agencies to support an early recommaissance and infrared attack alarm features of WS 117L.
- 25 Sep 58 ARPA Order No. 9-58 funds increased to \$136.2M. (Amendment No. 4).
- 25 Sep 58 Attack Alarm Development Plan transmitted to ARPA.
- Director, ARPA, informed AFMED he was not able to approve current SEMFHY Development Plan. Reasons: AFMED FY 1959 funding plan exceeded ceiling of \$215.M; achievements of major program objectives have been substantially delayed in spite of proposed funding level increases; FY 1960 budget is in excess of a considered realistic funding level. ARPA sent an Ad Hoc Project Group out to investigate, evaluate and recommend.
- 27 Sep 58 GOR No. 80(SA-2c) amended to include specific requirement for ICBM warning and tracking.

- 29 Sep 58 Responsibility for execution of ARPA Order No. 9-58 transferred from Commander AFHAD, to Commander ARDC. (Amendment No. 5)

 3 Oct 58 ARPA Ad Hoc Committee advised contractor that Attack Alarm would not be supported as part of SEMMEN program.
- 7 Oct 58

 In a personal message, General LeMay informed General Power that the Air Staff was solidly behind WS 117L, but basic budgetary restrictions prevented reprogramming response to this problem in a manner similar to wholly Air Force programs. In his opinion ARPA was also sympathetic but was suffering under the curse of an arbitrarily imposed financial ceiling. Assured General Power that USAF was providing support for ICEM Attack Alarm System.
- 8 Oct 58 AFEMD informed ARDC of ARPA apparent intent not to fund Attack Alarm development during FY 1959.
- 10 Oct 58

 ARPA directed AFRED to cancel all actions in WS 117L
 SENTRY program directed toward an ATIAS launch capability
 at AFREC, but not to cancel boosters since they may be
 used at Vandanberg AFB.
- 10 Oct 58 AFEMD informed ARDC that \$1.8M required to continue Attack Alarm from 15 October thru 15 December.
- 14 Oct 58 Hq USAF directed work continue on Attack Alarm development with funds to be provided.
- 24 Oct 58 Hq USAF provided Attack Alarm funds required to continue program to 15 December.
- 27 Oct 58 General Partridge briefed on Attack Alarm Development Plan.
- 1 Nov 58 DCS/D authorized \$2.4M FY 1958 P-244 funds for WS 117L.
- ARPA Order No. 38-59 proposed THOR-boosted flight to test Attack Alarm payload, ARPA funds program \$.75M for period November thru January 1959. The study and development begun as subsystem "G" of WB 117L was to be continued in accordance with order as an independent project to result in an orbitally flight tested missile defense alarm setellite. (MIDAS).
- 17 Nov 58 ARPA Order No. 41-59 authorized the design and construction of Sentry launch complex at Pt Arguello at \$6.65M.

20-21

Nov 58 Strategic, Air Defense and Reconnaissance panels of Weapons Board briefed on capability of MIDAS system.

25 Nov 58

ARPA directed ARDC to eliminate two of the small primate shots from the DISCOVERER test series. Two mouse, and one small primate shot were suthorized. The two cancelled small primate boosters were to be reassigned.

4 Dec 58

Mr. Roy W. Johnson, Director, ARPA, informed the Under Secretary of the Air Force that a progrem to develop a number of systems and techniques which would be employed in the operation of space vehicles had been inaugurated. This program, to be known as DISCOVERER, was to include THUR launchings associated with WS 117L plus other similar projects not operationally oriented. DISCOVERER-THOR costs were to be separated from WS 117L program (SENTRY). Separate development plans and progress reports were to be made for each. Tentative reallocation of funds were as follows: DISCOVERER, FY 1959, \$108M; FY 1960, \$60M. SEMINY, FY 1959, \$10M; FY 1960, \$100M.

Secretary of Defense and ARPA agreed to assign IOC for SEMINY to ARDC "for the next several years and until final objectives are obtained. "Tentative "centers" for the

program were to be operated by ARDC.

5 Dec 58

Mr. Roy W. Johnson, Director, ARPA, informed Under Secretary of the Air Force that reorientations of the DISCOVERER and SENTEY progress were proposed, and a study and review would be made. For this review, Air Force was to assume that \$213.3M was available in FY 1959 and \$160M in FY 1960. AFRIO should not exceed these resources. In areas where cancellations were contemplated, no procurements beyond those absolutely necessary should be made.

7 Dec 58

Mr. Roy W. Johnson revised his 25 November 1958 letter concerning bicmedical psyloads for DISCOVERER program to provide for one successful primate recovery up to a total of three attempts, if necessary and desired, to be in lieu of psyloads in the series of 13 flight vehicles.

11 Dec 58

Responsibility for execution of ARPA Order No. 9-58 transferred from Commander, ARDC to Secretary of the Air Force (Amendment No. 6).

11 Dec 58

AFRED informed USAF that \$9.3M was needed to continue Super "G" Attack Alaru (MIDAS) from 15 December 1958 to 15 February 1959.

- 15 Dec 58 Hq USAF funded MIDAS \$1.5M for 15 December thru 15 January 1959.
- AFMO briefed AF and ARPA on WS 117L reorientation in response to 4.5 December ARPA directives. AFMO also submitted alternate program reorientation suggestions.
- ARPA Order No. 48-59 to Sec AF requested Sec AF to continue study, development, and launch operations originally associated with the THOR phase of SEMPRY program under ARPA Order No. 9-58, as an independent project identified as DISCOVERER-THOR Project. Earlier costs will be transferred to the new project. Prepare a new financial plan by 15 January 1959.
- Mr. Roy Johnson, in a memorandum for the U/Sec AF, stated 17 Dec 58 that the fundamental objectives of the ARPA SEMIRY R and D program should be development of improved area reconnaissance with recovery techniques, point reconnaissance development. Surveillance should be based on planned film readout, reconnaissance on film recovery. Fly recoverable ATLAS-boosted. capsule early in 1961, with surveillance camera system in mid-1961. Funds for ARPA SERVINY: FY 59, \$215N; FY 60, \$160M. 1959 figure includes 13 DISCOVERER flights. To meet fund limitations, USAF requested to delete: 1) high energy fuels program for second stage; 2) development and test of 6 readout cameras and to consider use of recoverable ATLAS space vehicle as test bed for surveillance camera and ferret systems; and to consider use of ATIAS with 1960 operational recovery progrem for additional uses, etc. Mr. Johnson announced that ARPA supported USAF proposed operational program as presented.
- Amendment No. 1 to ARPA Order 41-59 authorized construction of a Guided Missile Assembly Building for SEMIRY program at Vandenberg AFB site. Increased funds from \$6.65M to \$9.82M.
- 19 Dec 58 Air Force contracts with IMED (-97, -181) combined.
- Iate First THOR boosted DISCOVERER on pad at Vandenberg AFB Dec 58 awaiting launch.
- Dec 58 Intense activity at AFRED in separating various phases of the WE 117L program, preparing separate development plans on THOR-DISCOVERER, SEWERY, MIDAS, and CARROUSEL phases of the program.

- 15 Jan 59 Hq USAF funded MIDAS \$1.5M (P-600) for 15 January 1959 thru 15 February 1959.
- 19 Jan 59 Amendment No. 7 to ARPA Order 9-58 increased available WS 117L funds from \$136.2M to \$138.2M.
- 21 Jan 59 First launch attempt of a DISCOVERER from Vandenberg AFB.

 Isunch terminated at T-60 by premature firing of the ullage rockets. Both the satellite vehicle and the THOR booster suffered damage. Isunch date was set back to late February.
- 28-30 Mr. McIntyre, Mr. Johnson and Air Staff briefed on proposed Jan 59 joint ARPA/USAF development of MIDAS.
- 30 Jan 59 AFMED published four new development plans--DISCOVERER, MIDAS, SEMIRY and CARROUSEL. Plans in accordance with ARPA-directed recriented program.
- 2-4 Feb 59 Hq USAF, ARDC and ARPA briefed on DISCOVERER, SEMIRY and CARROUSEL Development Plans. The proposed CARROUSEL was removed from further consideration.
- Mr. McIntyre in a memorandum for Secretary of Defense reemphasized Air Force position as to the urgency of the
 development of the MIDAS system and stated that the Air
 Force considered MIDAS to be of highest priority. Mr.
 McIntyre recommended that the SAF approve the fund augmentation requested by the ARPA stating ARPA's request for
 emergency funds for MIDAS be considered as a prior claim to
 any Air Force requests for emergency funds.
- Amendment No. 1 to ARPA Order 48-59 approved "in general" the DISCOVERER program as presented to the ARPA on 4 February 1959. The approval authorized a 13-vehicle program and made available \$104.3M for FY 1959.
- Amendment No. 8 to ARPA Order 9-58 approved "in general" the recriented SEMINY program as presented to the ARPA on 4 February. Total funds authorized on ARPA Order 9-58 were decreased from \$148.2M to \$96.6M for FY 1959.
- 17 Feb 59 ARPA Order 60-59 made \$1.1M available to defray the cost of modification and operation of the downrange telemetry ship, Pvt Joe E. Mann, thru 30 June 1959. The order announced that effective 1 July 1959 operational and funding responsibility for the ship would be transferred to the Pacific Missile Range.

- DISCOVERER I-163-1022 successfully launched at 1349 hours 28 Feb 59 from Vandenberg AFB.
- Amendment No. 1 to ARPA Order 38-59 approved, subject to 2 Mar 59 review, Phase I only of the MIDAS program and increased available funds under the order from \$.75M to \$8.0M. Instructions were given to AFRMD to submit plan for the procurement of ATIAS boosters and space vehicles for Phases II and III, long lead time items.
- AFRED directed by AFAEF to hold the six boosters removed 18 Mar 59 by ARPA in Amendment 1 to ARPA Order 48-59, (Program reduction from 19 to 13) on production, notify AF when funds for these six were required.
- Amendment No. 2 to ARPA Order 48-59 approved the develop-24 Mar 59 ment and funding plan dated 30 January 1959 for the DISCOVERER Program. The approval provided for a 13-vehicle program.
- Amendment No. 10 to ARPA Order 9-58 approved the AFRAD 3 Apr 59 SENTRY Development Plan of 30 January 1959 "to the extent it pertains to payload progress of visual readout visual recovery, and ferret readout".
- Amendment No. 4 to ARPA Order 17-50 directed AFBMD to modify 10 Apr 59 the Bell-Hustler stage to obtain dual descring capability, simplify guidance and control, and structures to contain psyloads of arbitrary shapes that may be carried; increase propellant capacity (\$5.1M). Deliver and launch at Pacific Missile Range two THOR-HUBILER vehicles suitable for 215 pound TRANSIT #2 psyload in 400 n.mi. circular orbit.
- DISCOVERER II launched from Vandenberg AFB. Satellite 13 Apr 59 orbited, but because of cumulative adjustment of the orbital ejection timer, the capsule was probably ejected in the Spitzbergen, Norwey, area. An unsuccessful area search (terminated 22 April) was conducted.
- By ARPA Order 38-59, Amendment No. 3, Phase I of the MIDAS 16 Apr 59 Development Plan (FY \$20.2M) was approved. Program objective strongly reoriented to give priority to quantitative scientific and engineering data, with objective to predict success or failure of an operational alarm system, improvement and design.

- AFRIO submitted DISCOVERER Development Plan dated 30 April 1 May 59 to Mr. Malcolm A. MacIntyre, Under Secretary of the Air Force. Major change over earlier 1 January plan was addition of ten flights, making a total of 25 flights.
- Mr. M. A. MacIntyre, Under Secretary of the Air Force, 8 May 59 requested that the Secretary of Defense designate the Air Force as service responsible for operational employment and utilization of the MIDAS system.
- AFRED informed by AFRAT that WE 117L had been removed from 18 May 59 Master Urgency List, and DISCOVERER and SERIKI put on it with DK ratings. Action was underway to obtain (from MSC or MASC) a DK rating for MIDAS. AF priority for all three programs remained as 1-A with 1-1 precedence.
- Amendment No. 4, ARPA Order 48-59 approved DISCOVERER 20 May 59 Development and Funding Plan dated 30 April 1959, on the 25-vehicle program. Funds were increased from \$104.3M to \$121.9%
- Amendment No. 4 to ARPA Order 38-59 increased funds for 20 May 59 MIDAS from \$10.8M to \$22.8M.
- ARPA directed that the mapping progrem be deleted from 26 May 59 SEMPRY. IMBD notified.
- DISCOVERER III launched from Vandenberg AFB. Failed to 3 Jun 59 achieve orbit because of less than nominal second stage performance and incorrect Pt. Mugu redar data indicating firing time. Data was received on the four mice passengers.
- AFRED was informed that ARPA had laid down ground rules 24 Jun 59 for the initial FY 1960 budget determination. These were: SEMIRY \$135.M, with SEMIRY recovery program (\$25M) to be deferred pending review; DISCOVERER, \$35.M for extension and completion of the series; NUDAS \$18.M ARPA funds, with assumption Air Force will fund \$26.9M when Phase II was approved. No increments to the above funds were available. AFMD was to submit revised development plans based on the above instructions. Until FY 1960 appropriations word was received, funds would be on a monthly basis.
- 25 Jun 59 DISCOVERER IV launched from Vandenberg AFB on a Polar orbit. While the launch was successful, the vehicle failed to achieve orbit because of less than normal second stage performance.

15 Jul 59 Revised DISCOVERER, SENTRY, MIDAS development plans submitted to ARPA, as required in 24 June instructions.

20 Jul 59 ARPA, USAF, ARDC, briefed on programs outlined in the revised development plans.
