REPORT 240
STOPPER AND BIT DEVELOPMENTS

Shauer, EDL, at long last, says he is authorized to proceed to build 11 more BIT's. Copley has told Lockheed to proceed to install on all 1100 birds, also SSD has told Lockheed payload managers to do the same.

I believe I reported that Stopper packages of the future will detect [redacted] if it tracks us.

EDL requests that we [redacted] request Army Intelligence Command (ACSI) Pentagon - a Captain Rogers in (DSR) branch to supply them with Z TWX's and documents - particularly the TWX's since they are now getting most of the documents but no TWX's. The TWX's contain the first information and the new information as soon as it is known. The documents come along 60 to 90 days later. I believe they are correct in their emphasis on the TWX's which they are not now getting, since no other project contains urgency.

Should the communication link [redacted] established to EDL be used for Alerts? Request answer soonest.

Distribution:

- Copy 1 - [redacted] OEL
- Copy 2 - Mr. [redacted]
- Copy 3 - OEL Registry

HANDLE VIA [redacted] CONTROL SYSTEM ONLY
