MEMORANDUM FOR SECRETARY BROWN

SUBJECT: MOL Manpower Requirements

In early December 1965, the Air Force Systems Command, in conjunction with the MOL management structure, implemented a comprehensive and detailed review and validation of AFSC manpower requirements to support the development of the Manned Orbiting Laboratory. These December studies originally confirmed a total requirement for 641 additional Systems Command manpower spaces. Through continued adjustments and reprogramming of Command resources, this requirement has been reduced to a present total of 296 additional required spaces. A summary, by fiscal year, of the remaining validated requirements is attached as Attachment #1. A detailed rationale for these figures is available for your review or use, if required.

As you know, AFSC now is in the process of implementing the FY 1967 manpower reductions directed in Format B (F-4-013). These reductions will severely constrain AFSC's ability to reprogram manpower internally to meet MOL needs. Therefore, while I consider it imperative that MOL requirements be fully satisfied, I do not believe that it is prudent to further reallocate the necessary MOL spaces from the austere AFSC manpower authorizations.

I therefore request your assistance in obtaining the 296 additional spaces required to support development of MOL or alternatively that OSD be approached for reallocation of 296 of the AFSC spaces identified for deletion in FY 1967 under the terms of Format B (F-4-013).

SIGNED

B. A. SCHRIEVER
General, USAF
Director, MOL Program
