President
ITEK Corporation
10 Maguire Road
Lexington 73, Massachusetts

Dear :

Thank you for your letter of 6 April indicating areas in which you think improvement of the present CORONA system is possible. I am forwarding the letter to Dr. Wheelon who will, I am sure, give it careful attention.

As I told you on Saturday, Gene Fabini has expressed his concern about the importance of a careful examination of all possible ways of improving existing satellite reconnaissance coverage pending the introduction of new systems. In the general search field, improvement of the CORONA system is of course the responsibility of the Agency and I have assured Gene that the Agency is continuing to examine possibilities for the improvement of this system.

Sincerely yours,
