C. [REDACTED]

6. CORONA/ARGON - Due to problems affecting the Retro-rocket, the next CORONA shot will be delayed until approximately 20 October.

Insofar as ARGON is concerned, a study is now under way to determine if its technical management should be taken away from ARPA. If this is done, it is presumed that part would go to Army and part to the Air Force, at which point CIA might very well bow out.

It was noted that the delay in CORONA might result in a surplus vehicle in case General Flickinger will be ready with another Bio-med package should this be determined desirable.

A tentative CORONA meeting has been set for October 12.
