5 MAR 1963

MEMORANDUM FOR: Assistant Director, OSA

SUBJECT: Camera Program for Mission 9053

1. For technical reasons, our request for an 82.6 degree inclination angle for subject mission has been denied. We are therefore forced to use our second choice of 75 degrees.

2. Because the COMOR targeting remains unchanged and illumination does not allow us to obtain ascending passes, I have authorized the approved camera program for Mission 9052 to be repeated for Mission 9053.

(Signed) [redacted]

Lt. Colonel USAF
Chief, Operations Division, OSA
