Subject: **INSTALLATION AND REMOVAL OF COMPONENTS FROM SYSTEM  
WITHOUT Q/A APPROVAL.**

It has been brought to my attention that there are several entries in the J15 Q/A Log Book which state that hardware was installed by Boston personnel without Q/A approval (no "OK to install" sign off). These entries are still open items as far as Q/A is concerned.

Since there are Q/A inspectors available in all areas, I do not anticipate any problem in implementing the request that Q/A sign off is mandatory for the removal and installation of hardware.
