LT Col. Cohen:

FY 4 and return file

Tom Magan

Approved for Release: 2019/05/21 C05108120
MEMORANDUM FOR THE RECORD

SUBJECT: Irving Chute Co, Gardena, California Facility

Discussed with KWBANJO, and LtCol Stevenson, SAFSP, the status of matters at subject facility on this date. Both and Stevenson visited the facility on April 22nd. The results of their findings are as follows:

1. The facility has stopped hiring non-citizens.

2. A 24 hour guard service has been implemented perimeter to the entire facility.

3. A guard and badging system has been implemented for the "Hartley Area". Physical security related to "Hartley Area" is being "beefed-up" by addition of steel wire above 7-8 feet partitioning walls which are not presently ceiling high.

4. The "C" and "G" chute work is being moved into the "Hartley Area", the target date is one week.

5. The facility is hiring a professional industrial security officer.

6. OSI (in coordination with and Bumm) is continuing investigation into possible sabotage. At present, the investigation is limited to checking "personals" and their possible association with chutes damaged in the past.

7. BANJO and SAFSP are beginning to suggest to facility management, those individuals who should not work in the "Hartley Area". There is no evidence that management will not cooperate completely.
8. QC procedures in general have been stepped up through the prime contractors.
