April 3, 1968

MEMORANDUM FOR: Mr. John E. Kirk

Following up on our telephone conversation this afternoon, this is to inform you of NASA's plans for handling the photographic aspects of the Apollo 6 mission scheduled for launch tomorrow morning. We are proceeding on the basis that your memorandum of March 28, 1968 (BYE 12881/68) and the relevant excerpt of the 303 Committee minutes (BYE 12022/68) approve acquiring the photography as planned. The enclosed documentation covers the space photography review process we have developed with Mr. Tidwell's office; this should meet the concerns Dr. Flax expressed in his memorandum of March 12 (BYE 12849/68).

Dr. Newell has asked that you inform Dr. Foster of the NASA planning in this area.
