APPENDIX—LIST OF UNCLASSIFIED JOURNAL ISSUES	18

FOREWORD

This is an index of articles published in unclassified editions of *National Reconnaissance Journal of the Discipline and Practice*. *National Reconnaissance* is a scholarly journal the Center for the Study of National Reconnaissance (CSNR) publishes on an occasional basis, both in print and digital formats. As individual articles become available, the CSNR issues advanced, pre-print versions.

The CSNR publishes the *Journal* for the information, education, and use of the broader national security community, especially those government and contractor personnel who are involved with national reconnaissance. The objective is to promote dialogue among these professionals and to identify lessons by facilitating a synthesis of the technical, operational, and policy components that define and shape the enterprise of national reconnaissance.

The knowledge that is accumulating in the collection of *Journal* articles is a valuable resource not only for the NRO workforce, but also for the other members of the Intelligence Community, as well as for the users of NRO products and resources.

The CSNR prepared this index as a resource for readers to find articles of interest. This index includes all *Journal* articles, to include those published in bound, printed issues, those published as pre-prints and re-prints, and those posted digitally on-line in advance of printed versions and consolidated issues.

The index is organized into three sections: author index, title index, and subject index. We listed all entries alphabetically in each section.
