

(b)(3)

(U) [] has released their BAA and GSSA for FY16 and as such has received the attached Phase I submission. Please evaluate this submission at your earliest convenience against the criteria listed below giving a YES or NO response for each. Finally assess whether or not we should proceed with asking the offeror for a Phase II proposal submission.

OFFEROR:
TITLE:
COST:

(U) PHASE I CRITERIA	YES/NO
(1) Impact to the NRO. The degree of potential applicability and impact of the proposed effort to the NRO mission. The CSM IA R&D Program is most interested in projects that significantly impact the ability of the NRO to accomplish its mission and provide dramatic improvements through new mission capabilities that directly solve critical intelligence problems.	
(2) Innovativeness of the proposed effort. The degree to which the proposed effort presents new and innovative research. The CSM IA R&D Program is interested in projects that are investigating previously unknown or uninvestigated concepts, technologies, methods, sources, etc.	
(3) Likelihood of rapid transition. The likelihood that the proposed effort will result in a near term operational capability. The CSM IA R&D Program is interested in projects that are investigating concepts, technologies, methods, sources, etc. with a high potential of resulting in an operational capability in three (3) years or less.	
(4) Uniqueness of the proposed effort to the NRO. The degree to which the proposed effort is solely, and uniquely applicable to the NRO. Due to funding limitations, the CSM IA R&D Program desires projects that are mostly unique to the NRO with less likelihood of development by other U.S. Government or Commercial sources.	
(U) For this phase of the evaluation, impact to the NRO is the most important factor, the innovativeness of the proposed effort and the likelihood of rapid transition are equally important factors, and the uniqueness to the NRO is the least important factor.	
(U) Please provide a YES or NO response as to whether or not we should proceed with asking the offeror for a Phase II proposal submission.	
(U) Offeror packages that successfully complete Phase I of the evaluation process will be requested to submit a proposal within 45 days for evaluation in Phase II.
