Participate in disposition of waivers utilizing sound judgement to insure acceptable hardware yet protecting the program schedules.

Verify test station/equipment certification and/or calibration.

Witness tests to verify compliance with approved test procedures and system requirements. Verify that any changes are properly documented.

Review and verify system data packages, log books, discrepancies, etc., in preparation for system acceptance and/or verification.

Advise the project office of status, progress, problems and plans associated with the above duties.

The program office has requested that the engineers be in the grade level range GS 11-13. They will of course need to be cleared for access.

I would appreciate your making some appropriate nominations for these positions so that I can arrange for their clearances.

Captain [redacted] my Staff can provide additional information on the project. His extension is 52725.
