

Taken over the photo from Pubini 6/15/60

24th June

A.E.S.

1. Research and Development

- What is purpose and schedule of each flight?
- What problems do you anticipate in the E&F areas?
- What answers do you expect to get to the R&D flight?
- What are the wants of the intelligence community during the Research and Development phase?

2. Operational Phase

- Discuss surveillance versus reconnaissance in E & F.
- Discuss beam-width versus pay-load limitations.
- Discuss frequency and cost of flight.
- Discuss payload plans and expected intelligence readout
- Discuss expected difficulties (include late recovery and abort; include both E & F).
- Discuss differences between operational and research and development phases in PAGES, LOGISTICS, PERSONNEL, Data Flow, Data Rates; and Data Handling.
