MEMORANDUM FOR COLONEL TENHUCE
COLONEL HUGHES

SUBJECT: WS-117L Program Data

1. The recent advancement of the WS-117L system to a highest priority status and the conversion to Gillette Committee procedures requires that special attention be given to program review and control data and procedures. Coincidentally with the above requirement, WDF is converting to a newer and more flexible method of recording and reproducing data.

2. Due to accelerated launch schedules of TCM boosted vehicles in the bio-medical and instrumented vehicle programs, an integrated program schedule is especially needed for this portion of the WS-117L program.

3. Therefore, I have instructed Colonel Sheppard to insure that the appropriate elements of the complex are en rapport relative to this problem and that he continue to monitor the effort to insure that all pertinent data are integrated and recorded.

Signed

Cys furnished:
Colonel Leonhard
Colonel Evans
