MEMORANDUM FOR COLONEL ODER
GEO WINTHROP

SUBJECT: Training-with-Industry Program for W5-117L System Officers

1. This memorandum pertains to the junior officers being trained in industry for system assignment rather than the more senior officers being trained for technical assignments. It also confirms my telephone conversation with the addresses on 23 October.

2. WIX needs to have information on the officers selected retained in WIX with at least the following elements: name, present location of the individual, proposed date and place of industrial assignment, and a copy of the officers' Forms 11.

3. The purpose of this information is to assist us in placement of those officers subsequent to their industrial assignment, to ensure that the firm concerned understand the intended use of the officers, and to assist USAF in ensuring that the most fruitful use is made of the time spent in the industrial assignment.

SIGNED

WILLIAM A. SHEPPARD
Colonel, USAF
Asst Deputy Commander
Military Space Systems
