DEFINITIONS

DEVELOPMENT TESTING

DEVELOPMENT TESTS ARE PERFORMED TO DETERMINE AND EVALUATE DESIGN FEASIBILITY,
FUNCTIONAL AND ENVIRONMENTAL PARAMETERS, TESTING AND EVALUATION METHODS,
MANUFACTURING, PACKAGING AND HANDLING TECHNIQUES.

QUALIFICATION TESTING

QUALIFICATION TESTS ARE PERFORMED ON PRODUCTION HARDWARE TO VERIFY THE CAPABILITY
OF THE DESIGN TO OPERATE UNDER ITS SPECIFIED ENVIRONMENTAL DESIGN REQUIREMENTS.

EFFECTIVENESS TESTING

EFFECTIVENESS TESTS ARE PERFORMED TO DETERMINE MARGINS OF SAFETY OF THE SYSTEM
WITH RESPECT TO STRESS AND/OR TIME BY OBTAINING DATA IN ADDITION TO THAT OBTAINED
DURING DEVELOPMENT AND QUALIFICATION TESTING.

ACCEPTANCE TESTING

ACCEPTANCE TESTS ARE PERFORMED ON PRODUCTION HARDWARE TO VERIFY CAPABILITY TO
MEET SPECIFIED PERFORMANCE AND WORKMANSHIP REQUIREMENTS AND PROVIDE A BASELINE
FOR REPEATABLE DATA.

(D) ~~SECRET~~ SPECIAL HANDLING

L-3683
Page 12 of 59
Cy 3 of 26

(D) ~~SECRET~~ SPECIAL HANDLING

TEST PHILOSOPHY/OBJECTIVES

GENERAL

- MAXIMIZE COMPLETE TESTING OF SUBASSEMBLIES IN THE PROGRESSIVE ASSEMBLY OF THE SYSTEM.
- PLAN THE PHASES OF TESTING (DEVELOPMENT - QUALIFICATION - FLIGHT ACCEPTANCE) SO THAT EACH SUBASSEMBLY OR ASSEMBLY COMPLETES ITS PHASES SEQUENTIALLY.
- MAXIMIZE CONSTANCY OF TEST SEQUENCE AND EQUIPMENT FOR REPETITIVE TESTING.
- EQUIPMENT SHOULD BE OPERATED AND MONITORED TO MAXIMUM EXTENT POSSIBLE DURING TESTS IMPOSING ENVIRONMENTAL CHANGES (THERMAL, VIBRATION, VACUUM, ETC.).

- FORMAL REQUIREMENTS, PLANS, AND PROCEDURES FOR ALL TESTING.
- ESTABLISH AN ORGANIZED RETEST POLICY FOR TEST FAILURES, INTERRUPTIONS.
- INTRODUCE FLIGHT CREW INTO ALL TESTS OF THE MAN/EQUIPMENT INTEGRATED SYSTEM AS EARLY AS PRACTICAL.
- AVOID REDUNDANT AND EXCESSIVE TESTING RESULTING FROM GEOGRAPHICALLY SEPARATED BUILDUP AREAS.
- MINIMIZE VEHICLE HANDLING REQUIREMENTS AND SEPARATE TEST SETUPS TO GREATEST EXTENT POSSIBLE.

DEVELOPMENT

- MAINTAIN DEVELOPMENT TEST EQUIPMENT AS TEST BEDS FOR FLIGHT SUPPORT AND TROUBLE SHOOTING.

QUALIFICATION

- FUNCTIONS SHOULD BE TESTED SEQUENTIALLY AS IN-FLIGHT PROFILE.
- REDUNDANT CIRCUIT FEATURES SHOULD BE INDEPENDENTLY DESIGN VALIDATED.

L-3683

Pg 13 of 59
Cy 3 of 26

(D) ~~SECRET~~ SPECIAL HANDLING

ACCEPTANCE

- REDUNDANT CIRCUIT FEATURES SHOULD BE INDEPENDENTLY DEMONSTRATED.
- TEST CONDITIONS AIMED TO DETECT QUALITY FAULTS.
- TEST SHOULD BE CAPABLE TO ISOLATE FAILURES TO BLACK BOX LEVEL WITHOUT DISASSEMBLY.
- EQUIPMENT EXPERIENCING UNEXPLAINED INTERMITTENT OPERATION PROHIBITED FOR FLIGHT USE.
- DATA TREND ANALYSIS SHALL BE PERFORMED BETWEEN SUCCESSIVE STEPS OF ASSEMBLY AND TESTING.
- NO TESTING SHOULD BE PLANNED THAT INVALIDATES A PREVIOUS TEST.
- PROVIDE ADEQUATE TESTING AT ALL LEVELS TO CONSISTENTLY DECREASE FAULT RATE DURING VEHICLE BUILDUP AND PREPARATION FOR DELIVERY TO LAUNCH SITE.
- VERIFY INTERFACES AT LOWEST ASSEMBLY LEVEL POSSIBLE, AND CONDUCT SYSTEM AND SEGMENT LEVEL TESTS, WHERE MEANINGFUL AND PRACTICAL, ONLY TO VERIFY REMAINING UNVALIDATED INTERFACES.

(D) ~~SECRET~~ SPECIAL HANDLING

DEVELOPMENT (O₁)

OBSERVATION

- DACO HAS NOT IDENTIFIED ANY DACO OBJECTIVES FOR THE MM ACOUSTIC TEST AT EK.
- EK AND GE HAVE OBJECTIVES FOR THE FOLLOWING TESTS AT DACO AND DACO IS NOT CONTRACTUALLY OBLIGATED TO TEST TO MEET THESE OBJECTIVES:
 - LM ACOUSTIC TEST
 - LV MODAL SURVEY
 - LV SHOCK TEST

PROBLEM

- MANY REQUIREMENTS DERIVING FROM OBJECTIVES OF OTHER ASSOCIATES HAVE NOT BEEN IDENTIFIED OR INCORPORATED INTO TEST PROGRAM PLANNING.

RECOMMENDATION

- ASSOCIATES SHOULD IDENTIFY AND SUBMIT THEIR REQUIREMENTS FOR TESTS TO COGNIZANT ASSOCIATE. BASED ON THE IDENTIFIED REQUIREMENTS, ALL ASSOCIATES SHOULD SCOPE THEIR CONTRACTS TO COVER ALL REQUIRED TASKS.

(D) ~~SECRET~~ SPECIAL HANDLING

L-3683
Page 18 of 59
Cy 3 of 26

DEVELOPMENT (O₂)

OBSERVATION

- ② GE CONDUCTS STATIC LOAD TESTS ON BAYS 2 AND 8 INDIVIDUALLY.
- ② DACO CONDUCTS DEVEL/QUAL STATIC TESTS ON THE BIRDCAGE CONFIGURED WITH BAYS 2 AND 8 STRUCTURE BUILT BY DACO TO GE DRAWINGS.

PROBLEM

- ② GE TESTS DIFFICULT TO CONDUCT DUE TO INABILITY TO SIMULATE BIRDCAGE ATTACHMENT LOADS.
- ② DACO TEST DOES NOT INCLUDE INSTRUMENTATION OF BAYS 2 AND 8

RECOMMENDATION

- ② CONDUCT INTEGRATED DACO/GE BIRDCAGE STRUCTURE TEST PROGRAM AT DACO.
- ② DELETE BAYS 2 AND 8 STATIC STRUCTURE TEST AT GE.

L-3683

Page 19 of 51
Cy 3 of 26

(D) ~~SECRET~~ SPECIAL HANDLING

DEVELOPMENT (O3)

OBSERVATION

- THE LM TEST CONFIGURATION AT DACO INCLUDES THE MISSION MODULE CONSOLE TEST ADAPTER (MISSION MODULE ELECTRICAL SUBSTITUTE).

PROBLEM

- THE MMCTA COMPATIBILITY WITH AVE/CITE IS NOT DEVELOPED AND VALIDATED DURING GE DEVELOPMENT TESTS ON VEHICLE 114 PRIOR TO SHIPMENT TO DACO.

RECOMMENDATION

- INCLUDE MMCTA IN THE DEVELOPMENT PROGRAM ON VEHICLE 114 AT GE TO INSURE COMPATIBILITY WITH CITE AND LM CONSOLES.

L-3683
Page 20 of 57

(D) ~~SECRET~~ SPECIAL HANDLING

(D) ~~SECRET~~ SPECIAL HANDLING

QUALIFICATION (O₁)

OBSERVATION

DAC PERFORMS AN ACOUSTIC TEST ON THE IM STRUCTURE WITH MASS SUBSTITUTES INSTALLED. MEASURED LEVELS ARE COMPARED TO COMPONENT ACOUSTIC QUAL LEVELS AND THIS SERVES AS THE BASIS FOR "IM ACOUSTIC QUALIFICATION".

PROBLEM

- THIS APPROACH IS NOT CONSISTENT WITH GE AND EK, WHO RUN AN ACOUSTIC QUAL TEST ON THE FUNCTIONAL MM.
- AN ACOUSTIC OR VIBRATION TEST OF A CRITICAL PORTION OF A FUNCTIONAL LABORATORY MODULE (UNPRESSURIZED SECTION) HAS NOT BEEN PLANNED.

RECOMMENDATION

DACO SHOULD CONSIDER CONDUCTING AN ACOUSTIC OR VIBRATION QUAL TEST OF A FUNCTIONAL IM UNPRESSURIZED SECTION.

* NEW RECOMMENDED TEST

(D) ~~SECRET~~ SPECIAL HANDLING

L-3683
Page 24 of 51
Cy 3 of 26

(D) ~~SECRET~~ SPECIAL HANDLING

QUALIFICATION (O₂)

OBSERVATION

THE EASTMAN MM QUAL TEST INCLUDES A TEST OF THE ASSEMBLED MM AND A TEST OF THE MMAS ALONE. THE MISSION MODULE IS QUALIFIED IN A THERMAL-VAC ENVIRONMENT FOR 15 DAYS. THE MMFS USED IN THIS TEST HAS BEEN PREVIOUSLY QUALIFIED FOR 30 DAYS. SUBSEQUENT TO THE 15 DAY COMPLETE MM TEST, THE MMAS IS QUAL TESTED FOR 30 DAYS.

PROBLEM

- THE RATIONALE FOR THE ASSEMBLED MM BEING QUALIFIED FOR ONLY 15 DAYS IN THE SYSTEM IS NOT CONSISTENT WITH THE 30 DAY QUAL CRITERIA FOR THE PROGRAM.
- THE RATIONALE OF SUBJECTING THE MMFS AND MMAS TO 45 DAYS OF THERMAL VACUUM QUAL IS NOT CONSISTENT WITH LOWER LEVEL (COMPONENT) DESIGN AND TEST SPECIFICATIONS (30 DAYS).
- THE MMAS PORTION OF THE EASTMAN TEST IS CONDUCTED AFTER THE ASSEMBLED MM TEST.

RECOMMENDATION

- ITEM 1 IS NOT CONSIDERED A PROBLEM, PROVIDING SUFFICIENT TIME IS ALLOWED FOR THE ASSEMBLED MM THERMAL DYNAMICS, FUNCTIONAL AND OPTICS TESTING. IT IS RECOMMENDED THAT THE TIME REQUIRED FOR ASSEMBLED MM THERMAL DYNAMICS, OPTICS AND FUNCTIONAL TESTING BE RE-EXAMINED WITH THE OBJECTIVE OF REDUCING THE T/V EXPOSURE.
- CONSIDER LIMITING THE TOTAL T/V EXPOSURE OF THE MMFS AND MMAS EACH TO NOT MORE THAN 30 DAYS, WITH THE DURATIONS OF THE INDIVIDUAL MMFS AND MMAS T/V EXPOSURES NOT TO EXCEED 30 DAYS MINUS THE DURATION OF THE ASSEMBLED MM TEST.
- CONSIDER RE-ARRANGING TEST SEQUENCE SO THAT ALL OR PART OF MMAS TEST BE CONDUCTED PRIOR TO TEST OF ASSEMBLED MM, CONSISTENT WITH RECOMMENDATIONS (1) AND (2).
- IF RECOMMENDATION (2) CANNOT BE MET, CONSIDER REDUCTION IN OBJECTIVES OF MM TEST, RETAINING THERMAL/OPTICS OBJECTIVES.

(D) ~~SECRET~~ SPECIAL HANDLING

L-3683
 Page 28 of 50
 of 26

(D) ~~SECRET~~ SPECIAL HANDLING

ACCEPTANCE (O₁)

OBSERVATION

- THE VALIDITY OF LOW LEVEL VIBRATION AND ACOUSTIC TESTING HAS BEEN QUESTIONED; FURTHERMORE, ACOUSTIC/VIBRATION ACCEPTANCE TESTING PHILOSOPHY IS INCONSISTENT BETWEEN ASSOCIATE CONTRACTORS.

EXAMPLE:

COMPONENTS		SYSTEM	TYPE TEST
GE	ON	MMFS - ON	LOW LEVEL VIBRATION
EK	OFF	MM - ON (ASCENT ONLY)	FLIGHT LEVEL ACOUSTIC
DAC	ON	LM - OFF	LOW LEVEL VIBRATION

- OBJECTIVE OF THESE TESTS, AS PROPOSED BY SOME OF THE CONTRACTORS, ARE TO IDENTIFY QUALITY AND WORKMANSHIP DEFECTS.

PROBLEM

THE ENERGY LEVELS TRANSMITTED TO AND THE RESPONSE OF INTERNAL COMPONENTS IS QUESTIONABLE IN LARGE "SOFT" MOL TYPE STRUCTURES. THE RESPONSE LEVELS ON INTERNAL COMPONENTS ARE ANTICIPATED TO BE VERY LOW WHICH INVALIDATES THE BASIC INTENT OF THE TEST.

RECOMMENDATION

A STUDY BE CONDUCTED IN DEPTH TO DETERMINE THE VALIDITY OF CONDUCTING VIBRATION AND ACOUSTIC ACCEPTANCE TESTS, TO SATISFY THE ABOVE STATED OBJECTIVE, ON THE VARIOUS MOL SEGMENTS. THE STUDY MUST ALSO ADDRESS A CONSISTENT TEST APPROACH/CONFIGURATION, THAT WOULD APPLY TO ALL ASSOCIATE SEGMENTS.

(D) ~~SECRET~~ SPECIAL HANDLING

L.3683
Page 29 of 57
Cy 3 of 26

V102-1

PAGE 30 of 59
CY 3 of 26

(D) ~~SECRET~~ SPECIAL HANDLING

ACCEPTANCE (O₂)

OBSERVATION

- MANY COMMENTS WERE SUBMITTED BY BOARD MEMBERS RECOMMENDING REDUCTION AND/OR DELETION OF VARIOUS SYSTEM LEVEL THERMAL VAC TESTS. HOWEVER, THESE COMMENTS WERE ASSOCIATED WITH THE SINGLE T/V TEST OBJECTIVE OF "DETECTING QUALITY DEFECTS".
- IN REVIEWING TOTAL T/V ACCEPTANCE TEST OBJECTIVES, THE BOARD DETERMINED THAT THE QUALITY DEFECTS OBJECTIVE IS "SUBSERVIENT" TO OTHER "PRIMARY" OBJECTIVES SUCH AS:
 - VERIFICATION OF MM THERMAL CONTROL CAPABILITY (HIGH TECHNICAL REQUIREMENT IN THE DORIAN MISSION).
 - VERIFICATION OF LM SYSTEM CAPABILITY TO INTERFACE WITH AND SUPPORT MAN. (CRITICAL ELEMENT IN A CRITICAL ENVIRONMENT).

RECOMMENDATION

NO CHANGE IN THE T/V ACCEPTANCE TEST PROGRAM.

(D) ~~SECRET~~ SPECIAL HANDLING

L-3683
Page 31 of 59
Cy 3 of 26

(D)—~~SECRET~~ SPECIAL HANDLING

ACCEPTANCE (O₃)

OBSERVATION

- GE PLANS TO CONDUCT A FUNCTIONAL RECEIVING TEST ON CONSOLES 2 AND 8 AT DAC (BEFORE INSTALLATION INTO THE LM BIRDCAGE).
- THE TEST IS A RE-RUN OF A SIMILAR TEST AT GE BEFORE SHIPMENT. (SHIPPING DAMAGE TEST)

PROBLEM

- SPECIAL AGE NEEDED TO CONDUCT THE TEST IS NOT PROVIDED AT DAC IN THE PRESENT PROGRAM.
- THE TEST IS NOT A TOTAL FUNCTIONAL TEST OF THE CONSOLES (EK INSTALLED EQUIPMENT CANNOT BE OPERATED).

RECOMMENDATION

- THE BOARD RECOMMENDS THE FOLLOWING:
 - DELETING THE TEST, OR
 - ADDITION OF NECESSARY AGE FOR THE GE TEST AND INVESTIGATING THE POSSIBILITY OF OPERATING EK EQUIPMENT.

L-3683
Page 32 of 59

MMTS CAPABILITY

DISCUSSION

- SUPPORTS MM TESTING AT EK
- MMTS CAPABILITY WILL IMPACT SCOPE OF TESTING
 - AVE PERFORMANCE IN OPERATIONAL MODES
 - DATA BASELINE
 - FAILURE DIAGNOSIS
 - EQUIPMENT REVALIDATION AFTER FAILURE AND FIX

PROBLEM

- PROGRAM DECISION TO REDEFINE MMTS HAS LED THE BOARD TO QUESTION THE VALIDITY OF MM LEVEL TESTING. TO INSURE THAT MM TESTING IS ADEQUATE, CERTAIN MMTS CAPABILITY MUST BE RETAINED.

L-3683
Page 35 of 50
Cy 3 of 26

(D) ~~SECRET~~ SPECIAL HANDLING

ELECTRICAL SYSTEMS

DEVELOPMENT

L-3683
Page 37 of 59
Cy 3 of 26

(D) ~~SECRET~~ SPECIAL HANDLING

(D) ~~SECRET~~ SPECIAL HANDLING

ELECTRICAL SYSTEMS DEVELOPMENT

OBSERVATION

- ① THE ASSOCIATES HAVE ATTEMPTED TO FOLLOW THE "BUILDING BLOCK" APPROACH IN ELECTRICAL SYSTEMS DEVELOPMENT TESTS. HOWEVER, SOME "BLOCKS" ARE MISSING IN THE PRESENT TEST PROGRAM, ESPECIALLY IN THE AREA OF INTEGRATED SEGMENT TESTING.
- ② ACTUAL TESTING OF MAJOR SEGMENT INTERFACES WILL OCCUR FOR THE FIRST TIME IN THE PROGRAM ON LV-3.
- ③ A MAJOR "HOLE WAS FILLED" DURING THE PROGRAM MANAGERS MEETING WHEN GE AVE AND AGE WAS ADDED TO THE EDCTU.

PROBLEM

- ① EK HARDWARE IS NOT INCLUDED IN THE EDCTU.
- ② A PROPER TOOL IS STILL LACKING IN THE DEVELOPMENT TEST PROGRAM TO SATISFY THE FOLLOWING OBJECTIVES:
 - ④ LM AVE SEGMENT-TO-SEGMENT INTERFACE COMPATIBILITY DEVELOPMENT
 - ④ LV INTEGRATED AVE/AGE COMPATIBILITY DEVELOPMENT
 - ④ SPECIAL ITEMS EMINATING FROM VEHICLE ACCEPTANCE AND FLIGHT PROGRAMS

RECOMMENDATION

- ① PROVIDE EK LM FLIGHT CONFIGURED ELECTRICAL COMPONENTS FOR THE EDCTU.
- ② UPGRADE THE OBJECTIVES OF THE EDCTU TEST PROGRAM TO INCLUDE THE LV, AS WELL AS LM, ELECTRICAL SYSTEM DEVELOPMENT OBJECTIVES.

THEN

- ① KEEP THE EDCTU IN AN UPDATED CONFIGURATION DURING THE MANNED FLIGHT PROGRAM FOR GROUND TROUBLE-SHOOTING PURPOSES DURING THE 30 DAY ON-ORBIT PERIODS. EDCTU WILL ALSO BE AVAILABLE FOR COMPONENT/ SYSTEM FAILURE ANALYSIS DETERMINATION.

FLOW REVISION GROUND RULES

- START LMQTV ASSEMBLY AND CHECKOUT ON PROPOSED FV-3 DATES
- LEARNING SPANS RETAINED IN FIRST PRODUCTION VEHICLE - LMQTV NOT FV-3
- THERMAL/VACUUM ACCEPTANCE ON FV-3 LM PRIOR TO T/V QUAL ON LMQTV

L-3683

Page 42 of 59
Cy 2 of 26

(D) ~~SECRET~~ SPECIAL HANDLING

LMQTV/LV-3 TEST FLOW

- PRESENT BASELINE (LV-3 PRECEEDING LMQTV)
 - PHILOSOPHY BASED ON EARLY FISCAL FUNDING RELIEF.
 - ENABLED A 3 MONTH SHIFT-TO-RIGHT OF FIRST "ALL UP" VEHICLE AND AGE IN RESPECT TO LAUNCH OF FV-3.
 - SINCE MAJORITY OF DEVELOPMENT AND QUALIFICATION TEST PROGRAMS ARE HARDPOINTED TO THE FIRST "ALL-UP" VEHICLE, THE 3 MONTH SHIFT WAS ALSO REALIZED IN THESE MAJOR COST PROGRAMS.

- BOARD PROPOSAL (LMQTV PRECEEDING LV-3)
 - FIRST "ALL UP" VEHICLE RETAINS IDENTICAL DATES FOR START OF ASSEMBLY AND CHECKOUT PER PRESENT BASELINE.
 - IMPACTS FROM THE BOARD'S PROPOSAL ARE MAINLY ASSOCIATED WITH SECOND "ALL UP" VEHICLE AND AGE. THIS MINIMIZES THE COST IMPACT ON EARLY FISCAL FUNDING.

MOL TEST PROGRAM

GENERAL ITEMS

1) REQUAL FACTOR IN SYSTEM LEVEL QUAL CYCLES -

DAC ALLOWS 50% REQUAL FACTOR

GE AND EK ALLOWS 0% REQUAL FACTOR(S).

THE IMPACT OF THE "NO REQUAL FACTOR" APPROACH SHOULD BE INVESTIGATED TO DETERMINE IMPACT ON MEETING LV-3 ACCEPTANCE SCHEDULE. (CONTRACTUAL DIFFERENCES)

2) GE CONSOLE ENVIRONMENTAL TEST REQUIREMENTS ARE NOT SPECIFIED. GE AVE IS TREATED ONLY AT THE SYSTEMS LEVEL WITH EMPHASIS ON MMFS ENVIRONMENTAL TESTING.

3) THERE IS LITTLE EVIDENCE OF SYSTEM LEVEL TESTING OF THE COMBINED LM TUNNEL AND TUNNEL HATCH. THE ADDITION OF SYSTEMS TESTING TO DAC'S TEST PROGRAM SHOULD BE INVESTIGATED.

4) IN THE PRESENT LM CHECKOUT CONFIGURATION A MULTITUDE OF TEST CABLES RUN THROUGH THE EVA HATCH. ROUTING OF CABLES INTO LM BY OTHER MEANS SHOULD BE INVESTIGATED TO REDUCE PANEL AND CONNECTOR WEAR DUE TO CABLE FLEXURE AND HANDLING.

5) THE BOARD RECEIVED NO EVIDENCE OF EMPHASIS ON SINGLE POINT FAILURE TESTING ANYWHERE IN THE TEST PROGRAM.

DAC will provide protection

FACILITIES RECOMMENDATIONS

- SINCE THE LM-DTS ACOUSTIC TEST IS A ONE-TIME-ONLY TEST AND REQUIRES ACOUSTIC CHAMBER MODIFICATION AT DACO, THE FEASIBILITY OF USING AN EXISTING ACOUSTIC FACILITY SHOULD BE STUDIED.

(D) ~~SECRET~~ SPECIAL HANDLING

* CONTRACTUAL

- HARDWARE ACCEPTANCE POLICY ON EXISTING CONTRACTS IS INCONSISTENT.
WILL EFFECT ROLES & RESPONSIBILITIES AGREEMENTS BETWEEN ASSOCIATE
CONTRACTORS.
- DAC IS NOT COVERED TO TEST TO ACHIEVE ASSOCIATE TEST OBJECTIVES
ON SOME INTEGRATED TESTING.

EXAMPLE:

- ASSOCIATES HAVE TEST OBJECTIVES DURING LMQTV TESTING.
LMQTV TEST COMPLETION IS INCENTIVIZED FOR DAC ONLY.
- DUMMY ROSS BARRELL FOR LM CHECKOUT.

OK

S U M M A R Y

- OPTIMIZE MMTS CHECKOUT CAPABILITY. *10/11/77*
- ^{4.7M} UPGRADE EDCTU TO A LV ELECTRICAL SYSTEMS DEVELOPMENT TOOL AND MAINTAIN, IN UPDATED CONFIGURATION, FOR TROUBLESHOOTING PURPOSES.
- REVERSE ORDER OF LMQTV/LV-3 ASSEMBLY AND CHECKOUT FLOW. *Agree; costs too high ~ 15M*
- ASSOCIATES IDENTIFY TEST OBJECTIVES FOR INTEGRATED TESTING.
- CONDUCT INTEGRATED DAC/GE BIRDCAGE STRUCTURE TEST AT DAC. *yes (A)*
- INCLUDE MMCTA IN DEVELOPMENT PROGRAM ON 114 AT GE. *Concur but on 115*
- DAC CONDUCT A VIBRATION/ACOUSTIC QUALIFICATION TEST OF A FUNCTIONAL LM UNPRESSURIZED SECTION. *cost (3M) O.K. (A)*
- LIMIT TOTAL THERMAL/VACUUM EXPOSURE IN QUALIFICATION TESTS OF MM SUBSYSTEMS TO 30 DAYS. *(A) says no to TORB*
- INVESTIGATE VALIDITY OF VIBRATION/ACOUSTIC TESTS TO MEET ACCEPTANCE OBJECTIVES.
- DETERMINE VALIDITY OF GE CONSOLE RECEIVING FUNCTIONAL TEST AT DAC. *(A) There will be addit. AGE cost should be done by DAC.*
- PROVIDE CONTRACTUAL COVERAGE TO ALL ASSOCIATES FOR ACCOMMODATING OTHER ASSOCIATE INTEGRATED ~~TEST~~ ^{Test} OBJECTIVES.
