SECURITY POLICY:

1. Information relating to military payloads and military payloads studies, studies relating to man's ability to perform functions associated with these military payloads and vehicle configuration data confirming the mission of these military payloads, will bear a minimum security classification of SECRET and will be controlled "Special Access" in accordance with provisions of this directive.

2. The need-to-know principles of security will be rigidly applied to all such information on the basis of need for specific information and with specific justification as to the field of interest.
3. The specific justification as to field of interest will be related to specific individual payloads and payload studies or to information concerning the laboratory vehicle revealing military payload data.

SECURITY PROCEDURES:

1. The approval for access to such information in all instances will be made by the Associate Administrator of National Aeronautics and Space Administration, the Associate Administrator for Manned Space Flight, NASA; the Associate Administrator for Space Science and Applications, NASA; the Associate Administrator for Advanced Research and Technology, NASA; and by those Directors of NASA Centers to whom such authority will be specifically delegated by the Associate Administrator, NASA. Lists will be maintained of all NASA and NASA contractor employees so approved.
2. All information falling within the definition of paragraph 1 of Security Policy (above) will be marked "Special Access/MOL Program" in addition to normal security classification markings, and will be divulged to only those individuals who have been duly approved for access.

3. Contractors utilized by NASA will submit lists of individuals requiring special access under this program to the appropriate NASA Centers for approval. The lists of individuals approved for special access under these provisions would be filed with the appropriate Department of Defense Cognizant Security Officer for that facility. The Directors of the NASA Centers will have the authority to delegate to the design study contractors, the authority to grant
interim 30 days special access, in those cases where there is clear indication that normal access approval processing would materially prejudice meeting the contract deadline.

4. The Department of Defense Cognizant Security Officer at each facility engaged in this program will insure compliance on the part of the contractors, and will bring all violations to the immediate attention of the appropriate NASA Center Director.

PUBLIC RELEASE OF INFORMATION POLICY

All public release of information by the National Aeronautics and Space Administration pertaining to the Department of Defense MOL Program will be subject to coordination and approval of the Assistant Secretary of Defense (Public Affairs).
